## PROJECTS

### API Test Automation Project (Trello API)

PERSONAL / OPEN-SOURCE • [github.com/MonicaPerdomoSantana/trello-api-automation](https://github.com/MonicaPerdomoSantana/trello-api-automation) • June 2025 – June 2025

- Developed a complete API test automation workflow for the Trello API using Postman, covering endpoints, responses, and error cases.
- Used GitHub Actions to automate daily test runs and publish rich HTML reports via GitHub Pages using Newman and the htmlextra reporter.
- Initially tested in a local CI environment with Docker and Jenkins before migrating to GitHub Actions for better integration and maintainability.
- Set up secure access to Postman collections via API key and configured scheduled runs (cron) for continuous feedback at 03:00 UTC.
- Focused on building a clean, reliable, and self-hosted reporting pipeline for visual and transparent test results.

### Test Plan & Bug Reporting — NextTask App

Solara Codeworks • [solara-next-task.netlify.app](https://solara-next-task.netlify.app) • April 2025 – May 2025

- Created a detailed test plan for a forked version of the open-source app *NextTask*, focusing on core CRUD features.
- Used Xray and Jira to manage test cases and bug tracking, with full documentation in Confluence.
- Ensured test traceability from user stories to execution, collaborating closely with a teammate handling development.
